

<b>CURRICULUM INTENT</b> The National and Early Years Foundation Stage Curriculum in England Commitment to the UN Global Action on Climate Change	PERSISTENCE		RESPECT		
	KNOW YOURSELF	MAKE EXCELLENT PROGRESS	ENJOY BEING ACTIVE	CELEBRATE DIFFERENCE AND DIVERSITY	MAKE A DIFFERENCE
	<b>Resilient Individuals</b>	<b>Respectful Communicators</b>	<b>Healthy Advocates</b>	<b>World Citizens</b>	<b>Environmental Ambassadors</b>
	Children to show resilience; to be able to approach challenges positively in all areas of life. To be independent and reflective learners, utilising these skills to enable a positive future.	Children to be effective communicators, interacting with confidence in a variety of situations. To be respectful and respond to others in a meaningful way.	Children to live healthy and active lifestyles. To promote positive, physical and mental health that will help to provide a strong foundation for their future.	Children to have a sense of their own belonging within the local, wider and global communities. To show a deep respect for the diversity of our world.	Children to have an experience-rich practical understanding of the environment. To show they care about the management and sustainability of our planet.
	STAND ON YOUR OWN TWO FEET	WORK WELL TOGETHER	DREAM BIG	EXPLORE AND CONTRIBUTE	EMBRACE THE OUTDOORS
	KINDNESS		ASPIRATION		

Learning to live, living to learn

## Strategies for supporting pupils with Special Educational Needs and Disabilities in Geography lessons

<b>Individual Need</b>	<b>Here's how we can help everyone learn...</b>
<b>Attention Deficit Hyperactivity Disorder</b>	<p>Due to its hands-on nature, Geography is an excellent subject for children with ADHD as it is an area they can excel within.</p> <ul style="list-style-type: none"> <li>• Ensure all resources are available for the children to explore prior to the lesson and, if support is needed to allow access to materials e.g. atlases, ensure the teacher or a TA is available.</li> <li>• During fieldwork, give clear rules to follow for safety and focus for the lesson. Accept that being outside is exciting but remain firm that the learning objective is the focus.</li> <li>• Allow time-out within the area of learning (if not learning in classroom e.g. fieldwork) where the child can calm down if needed – agree this space with the child as required.</li> <li>• There are lots of opportunities within Geography for group work – depending on the child, ensure they have a 'role' within the group and plan additional resources in case a pupil needs to work independently (regardless of needs prior to the lesson, the provision of individual learning within a planned group session should also be considered in case any child within the class is struggling).</li> </ul>

<p><b>Anxiety</b></p>	<ul style="list-style-type: none"> <li>• Most strategies for helping those with anxiety will be the same within Geography – knowing the child will help, ofcourse, and ensuring pre-teach is used where helpful.</li> <li>• Reassurance, especially for difficult concepts e.g. linesof latitude, longitude etc. and explaining several timesin different ways e.g. atlas, map, globe.</li> <li>• Time out or a short break if required.</li> </ul>
<p><b>Autistic Spectrum Disorder</b></p>	<ul style="list-style-type: none"> <li>• Geography lessons and fieldwork can be overwhelming for some children due to the changing nature of lessons –allow children time and space if they are overwhelmed.</li> <li>• Some children may have definite ideas based on theirprior (incorrectly learned) knowledge which may need to be ‘untaught’, e.g. which countries are in which continents, pyramids were in Ancient Rome etc. – be consistent when correcting ideas and have ‘proof’ e.g. atlas, globe, visual as well as written information sheets. Continue to go over these incorrect ideas with the new facts.</li> <li>• Be able to show understanding in a range of ways including visual as well as written information – for extended writing, teacher or TA support may be required.</li> </ul>
<p><b>Dyscalculia</b></p>	<ul style="list-style-type: none"> <li>• Physical resources, properly demonstrated, to be used.</li> <li>• Lots of practise looking from whole-world maps tosections – use physical props to help, e.g. ‘pictureframe’– draw a frame around an area and let the children explore the shapes of the land and sea to help build links.</li> <li>• Support with quantitative data e.g. graphs, charts etc,visual aids and word-mats to help with vocabulary.</li> </ul>
<p><b>Dyslexia</b></p>	<p>As well as the best practise for Dyslexic pupils e.g. font size andtype, in Geography, the following will be helpful:</p> <ul style="list-style-type: none"> <li>• Visual aids and word mats to help with vocabulary in addition to the knowledge organisers provided for the unit.</li> </ul>

	<ul style="list-style-type: none"> <li>• Reading text-heavy atlas pages or summarising within handouts if required.</li> <li>• A range of showing understanding – visual, written, drawing, graphs etc.</li> </ul>
<b>Dyspraxia</b>	<ul style="list-style-type: none"> <li>• A range of showing understanding – visual, written, drawing, graphs etc.</li> <li>• Support with quantitative data e.g. graphs, charts – provide scaffolded graphs for data to be added to.</li> <li>• Demonstrate any equipment to be used for Geography lessons or fieldwork.</li> </ul>
<b>Hearing Impairment</b>	<ul style="list-style-type: none"> <li>• Pre-teach if required.</li> <li>• Demonstrate use of equipment.</li> <li>• Visual aids if required.</li> <li>• When completing fieldwork, agree a way of ensuring all children know when/where to return to if on school site –if the cue is audio, e.g. whistle, ensure partner/group will give visual cues – we want to encourage independent fieldwork rather than providing TA support where it is not needed.</li> <li>• Ensure instructions are understood before the lesson begins and any additional instructions are provided in writing if required.</li> <li>• Visual aids and word mats to help with vocabulary.</li> </ul>
<b>Toileting Issues</b>	<ul style="list-style-type: none"> <li>• Allowances and provision needed when completing fieldwork away from school building/trips.</li> <li>• Allow rest time if needed.</li> </ul>
<b>Cognition and Learning Challenges</b>	<ul style="list-style-type: none"> <li>• Visual aids and word mats to help with vocabulary.</li> <li>• Demonstrate how to use equipment each time it is used for consistency and processing.</li> <li>• Break down tasks into manageable chunks and demonstrate each step as required.</li> <li>• Writing support for extended writing including examples of text and scaffolded frame.</li> <li>• Step by step instructions.</li> <li>• Group and partner work within fieldwork to help stay on task and provide peer support.</li> </ul>

<p><b>Speech, Language and Communication Needs</b></p>	<ul style="list-style-type: none"> <li>• Visual aids and word mats to help with vocabulary.</li> <li>• Demonstrate how to use equipment each time it is used for consistency and processing.</li> <li>• Break down tasks into manageable chunks and demonstrate each step as required.</li> <li>• Writing support for extended writing including examples of text and scaffolded frame.</li> <li>• Step by step instructions with understandable vocabulary.</li> <li>• Group and partner work within fieldwork to help stay on task and provide peer support.</li> </ul>
<p><b>Tourette Syndrome</b></p>	<ul style="list-style-type: none"> <li>• Be aware of tics when using globes – position them in middle of desk before use.</li> </ul>
<p><b>Experienced Trauma</b></p>	<ul style="list-style-type: none"> <li>• Positive reinforcement and positive atmosphere within lessons.</li> <li>• Fieldwork and experiential Geography may involve discussions or trigger memories of trauma – knowing your children in advance is very important and allowing time, space and the ability to discuss (or not to share) is very important. Similar to Jigsaw, discussion is welcome and sharing within class with boundaries and rules for not sharing other people's stories without permission to allow children to feel comfortable to chat knowing that their experiences will not be spread outside the classroom.</li> </ul>
<p><b>Visual Impairment</b></p>	<ul style="list-style-type: none"> <li>• Enlarge maps and show them on the large screen.</li> <li>• Give the children time and opportunity to explore through touch, e.g. outlines of maps, textures to evoke discussion etc.</li> </ul>
