

SITHNEY COMMUNITY PRIMARY SCHOOL

Geography - Core Concepts

Place, Time and Scale	What are the features of a place, how has it changed over time and how does it compare to other places (local, national and global), both smaller and larger?
Human geography	How humans have changed themselves, their communities and their environments.
Physical Geography	How environments have been shaped by natural events.
Interconnections	How people, places and process are connected.

SITHNEY COMMUNITY PRIMARY SCHOOL

Geography - Substantive Concepts

Environment	The space your learning about and how humans and the natural world have impacted on it.
Culture	The range of different behaviours, ideas and traditions and they way they impact the lives of humans.
Distance	Where you live, and how it compares to other local, national or international places.
Change	How an environment has changed over time based on how humans and the natural world have impacted on it.
Management	How humans control, and respond to, their environment.
Sustainability	How humans use the planet without damaging it for future generations.
